

CAELO

AI-Native Procedural Governance Platform

AI-Native **Procedural Governance Platform**

Transforming regulations, procedures and organizational knowledge into **governed**, **traceable** and **auditable** operational workflows.

Designed for highly regulated environments where human accountability, **transparency** and **operational control** remain essential requirements.

THE CHALLENGE

Organizations today face a growing challenge:

Increasing regulatory complexity

Regulations evolve constantly and become more intricate every day.

Fragmented procedural knowledge

Information is dispersed across systems, documents and organizational silos.

Dependence on individual expertise

Critical knowledge is often held by a few experts, creating operational risk.

Limited traceability of operational decisions

Many decisions cannot be easily traced, explained or audited.

Difficult adoption of AI in regulated environments

Traditional AI tools are not designed for compliance, control and accountability.

Traditional AI systems can generate answers, but not governed, reliable and auditable outcomes.

Regulated organizations require governed decisions, not just predictions or recommendations.

CAELO was created to **bridge this gap**.

What CAELO Is

CAELO is not a chatbot.

CAELO is not a document automation tool.

CAELO is a procedural governance layer that enables organizations to transform:

- ✓ Regulations
- ✓ Procedures
- ✓ Operational Workflows
- ✓ Governed Execution
- ✓ Traceable Outcomes

The platform combines **AI orchestration**, **procedural governance**, **human oversight** and **auditability** within a single operational environment.

CORE CAPABILITIES

Every operational action can be **explained, traced, reviewed and audited.**

CAELO

AI-Native Procedural Governance Platform

CAELO is the AI-native platform that governs **complex administrative procedures** from end to end, ensuring compliance, transparency, traceability and human oversight at every step.

PROCEDURE IN PRACTICE

CAELO — Practice walkthrough

View a real case. Every step is governed, traceable, explainable and auditable. The experience guides the user through an intelligent and compliant process.

Assigned to

Bianchi Luca
Role: DPS Operator
Team: Case Office
Type: TSTR-TRN

AI Assistant

CONTEXT NOTE
This phase is a critical step of the pension procedure. The AI assistant monitors rules in real time, checks requirements and highlights any anomalies. Based on the regulatory framework and case history, CAELO suggests the best actions, drafts documents and supports the operator with explanations. Every decision is traceable and justifiable, ensuring full compliance and reducing risk. The operator remains in control and validates or modifies the proposal with a human oversight model. The AI learns from outcomes to continually improve accuracy and efficiency.

Next recommended action
Complete and validate the data collection to proceed to the next phase of the procedure.

SUGGESTED ROLE
DPS Operator
NEXT STEP
Data Validation
DEPENDENCY
Preliminary data collection
DESTINATION
DPS_ACCESSO_PENSO_PRATICHE

STEP 1 - Intake

Phase New Auto System
The application is received, classified, and associated with the responsible operator.
VERIFICATION
Checks on applicant, protocol, data quality and completeness.

STEP 2 - Initial data collection

Phase New Edit Manual
Collection of personal data, contributions, service periods, employment history and documentation.
VERIFICATION
Cross-check with INPS databases and external sources. Anomalies are flagged.

STEP 3 - Position calculation

Phase New Edit System
The system calculates the pension position based on contributions, service periods and applicable rules.
VERIFICATION
Rule validation, contribution checks and calculation consistency.

STEP 4 - Rights validation

Phase New Edit System
Automatic verification of entitlement to benefits and regulatory requirements.
VERIFICATION
Rule engine validation and compliance checks.

STEP 5 - Decision proposal

Phase New Edit Human
The system generates the proposal of decision. The operator reviews, adjusts if needed and approves.
VERIFICATION
Human review, reasoning traceability and approval.

STEP 6 - Decision & communication

Phase New System
The decision is issued, communicated to the applicant and archived.
VERIFICATION
Outcome delivery, communication tracking and archiving.

AI-NATIVE

Artificial intelligence embedded in every step of the procedure.

COMPLIANCE BY DESIGN

Built-in regulatory compliance, auditability and traceability.

HUMAN OVERSIGHT

Operators remain in control with full transparency.

END-TO-END GOVERNANCE

From intake to decision, every action is governed.

CONTINUOUS IMPROVEMENT

Learns from outcomes to optimize accuracy and efficiency.

SCALABLE & ADAPTABLE

Designed to scale across procedures, organizations and domains.

Core Capabilities

CAeLO integrates **AI, governance and compliance** into a **unified operational intelligence platform**.

01 | AI ORCHESTRATION

AI-native orchestration of procedures, data, rules and decisions.

02 | PROCEDURAL GOVERNANCE

End-to-end governance of complex administrative procedures.

03 | DECISION TRACEABILITY

Complete traceability of every decision, data change and action.

04 | HUMAN OVERSIGHT

People-in-the-loop with full transparency and control.

05 | OPERATIONAL EXPLAINABILITY

Explainable AI and operational clarity at every step.

06 | AUDITABILITY-BY-DESIGN

Built-in audit trails, evidences and compliance records.

07 | COMPLIANCE-ORIENTED CONTROLS

Regulatory-first design with continuous compliance and risk management.

CAeLO. ONE UNIVERSAL ENGINE. ANY DOMAIN. ANY SYSTEM. ANY COUNTRY.

Built to connect. Designed to govern. Ready for the future.

KNOWLEDGE INDUSTRIALIZATION ENGINE

Transforming domain knowledge into governed operational intelligence.

The Knowledge Industrialization Engine transforms regulatory and organizational knowledge into a structured, governed and reusable procedural asset.

CORE CAPABILITIES

KNOWLEDGE ACQUISITION

Capture legislation, procedures, policies and expert knowledge.

PROCEDURAL MODELING

Transform domain expertise into governed operational workflows.

SOURCE LINKING

Maintain permanent links to legal, regulatory and documentary sources.

GOVERNANCE & VERSION CONTROL

Manage lifecycle, approvals and continuous evolution.

AUDITABILITY & TRACEABILITY

Every procedural element remains explainable and fully traceable.

HUMAN OVERSIGHT

Experts remain in control of every critical decision.

CONTINUOUS EVOLUTION

The knowledge base evolves together with regulations and organizational changes.

FROM KNOWLEDGE TO OPERATIONAL AI

DOMAIN KNOWLEDGE

Laws, regulations, policies, procedures, expertise.

KNOWLEDGE INDUSTRIALIZATION ENGINE

Industrializes, structures and governs knowledge.

GOVERNED KNOWLEDGE BASE

Structured, verified, versioned and fully traceable.

CAELO VERTICAL

A governed, auditable and ready-to-use procedural solution.

OPERATIONAL AI

Trusted, explainable and human-centered execution.

OUTPUT

A governed, auditable and reusable procedural knowledge base capable of automatically generating new CAELO Vertical Solutions.

ONE ENGINE. INFINITE VERTICALS.

The Knowledge Industrialization Engine transforms domain knowledge into governed, auditable and ready-to-use CAELO Verticals.

ONE ENGINE TO INDUSTRIALIZE KNOWLEDGE. INFINITE VERTICALS TO TRANSFORM ORGANIZATIONS.

CAELO – THE UNIVERSAL PROCEDURAL GOVERNANCE ENGINE

ONE ARCHITECTURE. EVERY PROCEDURE. ANY COUNTRY.

The AI-native platform that orchestrates, governs and monitors administrative procedures across all domains, systems and administrations.

VALIDATED IN ITALY.

Adaptable to any legal,
regulatory and operational
framework.

**DOMAINS
ANY REGULATED
SECTOR**
From social security
to public administration
and beyond.

**GOVERNANCE
DETERMINISTIC**
Rules, policies and controls
ensure consistency
and certainty.

**EXPLAINABILITY
BY DESIGN**
Every action is explainable,
understandable and
traceable.

**AUDITABILITY
END-TO-END**
Full audit trail across
every step, decision
and interaction.

**HUMAN OVERSIGHT
ALWAYS**
People in control.
AI as an enabler,
never a replacement.

ONE ENGINE. EVERY PROCEDURE. EVERY ADMINISTRATION.

From one architecture to every European procedure.

MARKET OPPORTUNITY

CAELO has been designed as a **domain-agnostic platform**.

Potential applications include:

-  Public Administration
-  Regulatory Compliance
-  Financial Services
-  Insurance
-  Healthcare
-  Enterprise Governance
-  Complex Operational Workflows

The platform addresses a growing global demand for **controlled and accountable** AI adoption.

WORKS ACROSS ALL ADMINISTRATIONS

INTEROPERABLE WITH ALL EUROPEAN SYSTEMS

CAELO IS A UNIVERSAL ENGINE
BUILT TO OPERATE ANYWHERE. CONNECT ANYTHING. GOVERN EVERYTHING.

Domain-Agnostic
Designed to adapt to any domain or regulation

System Interoperability
Connects with any system via standard APIs

Future-Ready
Built to evolve with technology and regulation

Global Scalability
From single agencies to entire nations

Trusted by Design
Transparency, traceability and accountability at scale

VALIDATION AND OPPORTUNITY

Caelo has already reached an **advanced stage of development and operational maturity**.

The platform has been **validated** within a highly regulated procedural environment, allowing the team to test:

Procedural governance

Human oversight mechanisms

Traceability models

Audit processes

Knowledge governance

Operational workflows

The objective is not a single-domain solution, but a **scalable governance platform** applicable across multiple regulated sectors.

WHY IRELAND

Ireland. Connecting Innovation. Driving Global Impact.

Ireland sits at the heart of Europe — **open, innovative, connected.**

The ideal environment for technology innovation and international growth.

Ireland represents one of Europe's **leading environments** for technology **innovation and international growth.**

WE BELIEVE IRELAND OFFERS:

A WORLD-CLASS TECHNOLOGY ECOSYSTEM

A vibrant hub of **global tech companies**, research centers and **top talent**.

STRONG AI EXPERTISE

Deep capabilities in Artificial Intelligence, Data and Advanced Technologies.

ACCESS TO INTERNATIONAL MARKETS

A strategic **gateway to Europe**, the UK and the global market.

STRATEGIC INVESTORS AND PARTNERS

A mature ecosystem of **investors, accelerators** and corporate partners.

A SUPPORTIVE ENVIRONMENT FOR HIGH POTENTIAL START-UPS

Pro-business policies, **innovation incentives** and world-leading **infrastructure**.

VALIDATION OPPORTUNITIES AND SCALING PATHWAYS

The ideal environment to **validate, scale** and **internationalize** solutions.

VALIDATE. SCALE. SUCCEED.

We are interested in exploring **validation opportunities, strategic partnerships** and **international scaling pathways** in Ireland.

250+

Global Tech Companies

IRELAND BY THE NUMBERS

40,000+

Tech Graduates Annually

1st

in the EU for FDI per Capita

Top 10

Global Innovation Rankings

BUILT FOR THE FUTURE. CONNECTED TO THE WORLD.

Ireland is where innovation meets opportunity.

Let's build the future together.

STABLE & BUSINESS FRIENDLY

Proven track record of economic stability and ease of doing business.

TALENT & EDUCATION

World-class universities and a highly skilled workforce.

INNOVATION INCENTIVES

Attractive R&D tax credits and innovation supports.

DIGITAL INFRASTRUCTURE

Best-in-class connectivity and digital infrastructure.

SUSTAINABLE FUTURE

A commitment to sustainability and a green economy.

FOUNDING TEAM

Together, the founding team combines **strategic leadership**, **institutional engagement** and **procedural-domain expertise** to support the international development of **CAELO**.

STRATEGIC LEADERSHIP

Driving the vision, growth and international expansion of CAELO.

INSTITUTIONAL ENGAGEMENT

Building relationships with public institutions and regulatory stakeholders.

PROCEDURAL-DOMAIN EXPERTISE

Designing and governing complex administrative and operational models.

INTERNATIONAL GROWTH

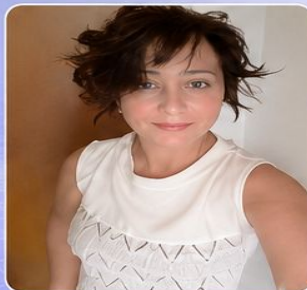

Expanding CAELO's impact across countries, markets and ecosystems.

Simone Catania

CEO

Strategic Vision. Business Development. International Growth.

Claudia Catania

Responsible for legal-process design, institutional roles, regulatory analysis, stakeholder engagement and the translation of legal and administrative procedures into structured operational models for AI-driven governance systems.

Rosa Catania

Co-Founder & Chief Product & Domain Architect. Product Vision. Procedural Modeling. Governance Architecture.
